BRECK'S OF BOSTON

SEEDMEN SINCE 1818
BOSTON 10, MASS.

Dear Gardening Friend:

BRECK'S SEEDS ARE YOUR BEST BUY!

Think of it! A single packet of seeds, at very nominal cost, will produce thousands of lovely flowers or a season's supply of your favorite vegetable! If you enjoy trying new and better varieties, you can always grow them from seed. In most cases, started plants will not be available for several years, if ever. There's no greater thrill than growing your own seedlings and watching them develop into strong, healthy plants—and it's easy to do with Breck's Tested Seeds and garden supplies!

Breck's Seeds are the finest that money can buy! Our buying staff contracts with specialist growers, and checks to see that all stocks meet our rigid specifications. New strains are checked for performance in different sections of the country. Notes are compared, records are kept and when—and not before—the experts are convinced of their worth, they are offered for your garden.

Breck's seeds are fresh! Guaranteed to grow and produce the varieties you want. You must be satisfied or your money will be refunded.

Breck's Seeds are guaranteed to grow because germination is tested several times before they are packeted. Trueness to name, and proper balance in mixture, are checked. All packets are dated to insure freshness. All leftover packets are destroyed at the end of the season.

Buy quality! Breck's Seeds and Bulbs are postpaid to your door! You can save still more money, too. See special offer below.

Yours for better gardens,

Luther A. Breck, Jr.

BRECK'S FAMOUS "1818" LAWN SEED

- GUARANTEED TO GIVE YOU A LUSH, GREEN LAWN
- FOR NORTHERN, "COOL WEATHER" STATES OR HIGH ELEVATIONS OF THE MID-SOUTH

Breck's "1818"—named for the year Joseph Breck began selling seeds—is the finest mixture of re-cleaned, weed-free 100% perennial grasses (Bluegrasses, Fescues, Bentgrasses) you can buy! When you buy Breck's "1818", you buy a prescription formula that is maintained from year to year. Newly introduced grasses are added only after thorough testing for adaptability, disease resistance, habit of growth, ease of management, etc. An example is Pennlawn Creeping Fescue, a premium grass introduced several years ago, which is noted for disease resistance and its ability to spread rapidly and form a thick, durable turf.

"1818"

Breck's "1818" is economical, too . . . it contains the cleanest, purest seeds grown, re-cleaned to the highest possible purity. Guaranteed 99.7% weed-free—over 97% pure seed—up to SIX TIMES AS MANY SEEDS PER POUND as so-called "economy" mixtures. "1818" covers more ground, and contains 100% permanent grasses that grow and spread each year, making a thick, heavy turf.

For people who desire a really beautiful, smooth, lush lawn, there is no better grass available anywhere! "1818" is adapted to any of the northern or cool weather states . . . or to the higher elevations of the mid-South. Remember: Breck's **GUARANTEES** you a good lawn with "1818" Lawn Seed or your money back!

HOW TO GROW BEGONIAS

For early blooms, start indoors in soil or dampened peat moss in February or March. Begonias may be grown in boxes or flats, but the Fiber Pots (see page 50) or the Begonia Starter Sets are ideal.

Just set the tubers into the soil or peat moss, hollow side up, and covered not over $\frac{1}{2}$ -in. Water sparingly until they sprout, increasing the amount as leaves appear. Choose a window or porch with good light, temperature from 60 to 70 degrees.

After a few weeks, plants will have extensive root systems and may be transplanted into 8-in. pots (p. 7). Set outdoors after all danger of frost is past. Choose a shady spot sheltered from strong winds.

1092 Summer Snow

1. Caladiums will do well outdoors where summer daily temperatures average 70° or more. This includes most of the United States except the extreme northern section.
2. They are very much at home in deep shade . . . where little else will grow . . . providing masses of gorgeous color to brighten dark corners. They do well in semi-shade and also in full sunlight. When grown in full sun, they should not be allowed to become dry.
3. Bulbs may be started indoors as early as February 15 and transplanted outdoors when weather is settled warm. They do not like cold weather. Caladiums, of course, do well in pots or tubs used as patio decorations or in window boxes.
4. Bulbs planted directly into the garden when soil is warm (after Memorial Day in the latitude of Boston) will produce magnificent plants in less than a month!
